

VINEYARDS

Sites 45% Westside Farms, 20% Kilcullen, 10% Dutton Sebastopol, 10% Frank

Johnson, 9% Rochioli Allen, and 6% Bucher

Soil & Clonal Selection These are cool sites, with low vigor soil such as Goldridge Loam, planted between

1978 and 2013. The vineyards are mostly planted to UC Davis Clone 4, known for its prominent acidity and large clusters, with lesser percentages of Wente and

aromatic clones like Rued.

VINTAGE

Growing Season The 2020 growing season began with rainfall well below average, and colder

nighttime temperatures delayed budbreak. Cold spells and some spring rain interrupted bloom, causing shatter and smaller berries at many Chardonnay sites. Weather warmed up after bloom, with temperatures slightly higher than normal through the rest of the season. Tiny yields and the threat of smoke from wildfires increased the rate of harvest in August and into September. After our most

challenging harvest ever, we were fortunate to find that none of the fruit brought

in was affected by smoke taint, sensorially or analytically.

Harvest Dates | Brix August 18 - September 9 | 22.3° average

WINEMAKING

Fermentation We press whole clusters for phenolic delicacy. Native-yeast and full native

malolactic fermentation take place in barrel, with sur lies bâtonnage.

Aging After aging 12 months in 10% new French oak barrels (Taransaud Beaune,

François Frères), the Chardonnay was traditionally fined for clarity during the

following harvest and bottled without filtration in January 2022.

Cases | Alcohol 6,636 | 13.5%

Release Date October 2022

Coming from special vineyard sites, our Chardonnays show great depth of flavor, length of finish, aromatic complexity, and a fine balance between richness and delicacy. Typically, the climate is cool and the soil vigor low, producing graceful yet vibrant wines.
